ESHELMAN  
SCHOOL OF PHARMACY

## Industry-sponsored Fellowships in Drug Development & Clinical Research

The UNC Eshelman School of Pharmacy at the University of North Carolina at Chapel Hill, in cooperation with PPD, United Therapeutics, and GlaxoSmithKline, sponsors two-year fellowships in drug development and clinical research.

Each fellow will participate in clinical research projects with faculty at the UNC Eshelman School of Pharmacy and with members of either PPD, United Therapeutics, or GlaxoSmithKline. Fellows will design, initiate, conduct, and analyze research as part of the learning experience.

Fellows will develop their expertise in proposal development; regulatory affairs; clinical site monitoring; data analysis, including PK and PD studies in healthy subjects, patient populations, or relevant in vitro/pre-clinical models; drug assay methodologies; and biostatistical analysis.

Fellows may participate in selected course work in clinical research methods, clinical study design, biostatistics, advanced pharmacokinetics and pharmacodynamics, pharmacogenomics, data management, advanced therapeutics, drug metabolism, and/or molecular biology.

Ideal candidates will have a PharmD, PhD, or MD. Residency training is preferred, but not required.
