OUTREACH ACTIVITIES as PART of the NSF CAREER AWARD

- 2015 – present: Outreach to K12 and First Generation College Students via summer research internships
 - Work with high-needs public schools in Buffalo and the Carolina region, which have a high percentage of underrepresented students, for in-lab experience and direct mentorship.
 - Developed online video platform to enable students and the public to visualize, and therefore better understand, science, leveraging the visual-pictorial and auditory-verbal power of animations.
 - Our video online learning platform has shown to significantly decrease the entry threshold into STEM for minority and 1st generation students to enter STEM and to engage in research
