

UNC Eshelman School of Pharmacy Student Course Evaluations Annual Report Fall 2019 – Summer 2020 Results by Semester Professional, Graduate, and Elective Courses and Instructors

The School’s [Policy and Procedures on Student Evaluation of Course and Instructor Effectiveness](#) states the Office of Strategic Planning and Assessment (OSPA), using established criteria, will review all student course evaluation results to determine whether any courses or instructors warrant further review or are worthy of recognition (*Appendix A*).

This report presents a summary of the *Fall 2019, Spring 2020, and Summer 2020* student course evaluation results that met the School’s established review criteria. It is important to keep in mind that student course evaluations represent *one* component of an overall course and instructor assessment process. The results do not reflect peer evaluation of instructor teaching effectiveness or a comprehensive, systematic review of a course.

Fall 2019 Student Course Evaluations Summary Report

PREFACE

The School's [*Policy and Procedures on Student Evaluation of Course and Instructor Effectiveness*](#) states that the Office of Strategic Planning and Assessment, using established criteria, will review all student course evaluation results to determine whether any courses or instructors warrant further review or are worthy of recognition (*Appendix A*).

This report presents a summary of the *Fall 2019* student course evaluation results that met the School's established review criteria. The following tables specify the number of courses and instructors evaluated, the number and percentage of courses and instructors *warranting further review*; and the number and percentage of courses and instructors *worthy of recognition*.

It is important to keep in mind that student course evaluations represent *one* component of an overall course and instructor assessment process. The results do not reflect peer evaluation of instructor teaching effectiveness or a comprehensive, systematic review of a course.

Spring 2020 Student Course Evaluations Summary Report

Spring 2020 COVID-19:

The UNC Eshelman School of Pharmacy transitioned to remote learning for all courses and reduced operations per University guidelines in mid-March 2020 in response to the COVID-19 global health pandemic. This transition impacted instructional practices and the student learning experience starting with the Spring 2020 semester.

This transition in the teaching and learning environment should be considered when reviewing the following results. Student feedback on courses and instructors is one of multiple data sources in review of faculty instructors and curricular quality improvement efforts.

PREFACE

The School's [*Policy and Procedures on Student Evaluation of Course and Instructor Effectiveness*](#) states that the Office of Strategic Planning and Assessment, using established criteria, will review all student course evaluation results to determine whether any courses or instructors warrant further review or are worthy of recognition (*Appendix A*).

This report presents a summary of the *Spring 2020* student course evaluation results that met the School's established review criteria. The following tables specify the number of courses and instructors evaluated, the number and percentage of courses and instructors *warranting further review*; and the number and percentage of courses and instructors *worthy of recognition*.

It is important to keep in mind that student course evaluations represent *one* component of an overall course and instructor assessment process. The results do not reflect peer evaluation of instructor teaching effectiveness or a comprehensive, systematic review of a course.

¹⁰ Course Directors identify instructors to be evaluated by students; there are no requirements on number of contact hours taught in order to be evaluated. Therefore, some instructors may have taught only one class session; whereas, other instructors may have taught numerous times in one or more courses.

¹¹ If an instructor was evaluated in more than one course, in a given Program or Course Type, s/he is only counted once.

¹² If an instructor met “warrants further review” criteria more than once, in a given Program or Course Type, s/he is only counted once.

¹³ If an instructor met “worthy of recognition” criteria more than once, in a given Program or Course Type, s/he is only counted once.

Summer 2020 Student Course Evaluations Summary Report

Summer 2020 COVID-19:

The UNC Eshelman School of Pharmacy transitioned to remote learning for all courses and reduced operations per University guidelines in mid-March 2020 in response to the COVID-19 global health pandemic. This transition impacted instructional practices and the student learning experience starting with the Spring 2020 semester.

This transition in the teaching and learning environment should be considered when reviewing the following results. Student feedback on courses and instructors is one of multiple data sources in review of faculty instructors and curricular quality improvement efforts.

PREFACE

The School's [*Policy and Procedures on Student Evaluation of Course and Instructor Effectiveness*](#) states that the Office of Strategic Planning and Assessment, using established criteria, will review all student course evaluation results to determine whether any courses or instructors warrant further review or are worthy of recognition (*Appendix A*).

This report presents a summary of the *Summer 2020* student course evaluation results that met the School's established review criteria. The following tables specify the number of courses and instructors evaluated, the number and percentage of courses and instructors *warranting further review*; and the number and percentage of courses and instructors *worthy of recognition*.

It is important to keep in mind that student course evaluations represent *one* component of an overall course and instructor assessment process. The results do not reflect peer evaluation of instructor teaching effectiveness or a comprehensive, systematic review of a course.
