SCORE: A State-Level Program to Enhance Reach, Integration, and Scalability of Colorectal Cancer Screening and Follow-up for Vulnerable Populations

The specific aims for our study are: Aim 1 (Planning and Exploratory Phase): Pilot test a multilevel intervention to increase CRC screening in vulnerable populations in three NC regions.

In this phase, we will complete pilot studies needed for our signature trial, plan for implementation evaluation and sustainability, and develop a process for evaluating locally-developed innovative approaches for improving screening. Aim 2 (Implementation Phase):

Building on Aim 1 findings, implement and evaluate multilevel CRC screening approaches in vulnerable populations in NC.
