

Student Evaluation of Course and Instructor Effectiveness Summary Report Fall 2022 – Summer 2023 Results by Semester

PREFACE

The School's [Policy and Procedures on Student Evaluation of Course and Instructor Effectiveness](#) states that the Office of Organizational Effectiveness, Planning, and Assessment (OE), using established criteria, will review all student course evaluation results to determine whether any courses or instructors warrant further review or are worthy of recognition (*Appendix A and B*). Note revisions to the instrument and policy & procedures were implemented starting Spring 2023 after endorsement from stakeholders.

This report presents a summary of the *Fall 2022, Spring 2023, and Summer 2023* student course evaluation results that met the School's established review criteria. The following tables specify the number of courses and instructors evaluated, the number and percentage of courses and instructors *warranting further review*; and the number and percentage of courses and instructors *worthy of recognition*.

It is important to keep in mind that student course evaluations represent *one* component of an overall course and instructor assessment process. The results do not reflect peer evaluation of instructor teaching effectiveness or a comprehensive, systematic review of a course.

Table 2: Course Evaluation Review Criteria

The Office of Organizational Effectiveness, Planning, and Assessment reviews all professional and graduate course evaluation results (including electives) using the below criteria:

Course

A. Courses Warranting Further Review

1. Median rating of <3 on 3 or more questions; **OR**,
2. Median rating of <3 for "overall rating of course" question

B. Courses Worthy of Recognition

1. Median rating ≥ 4.5 on 4 or more questions; **AND**,
2. Median rating ≥ 4.5 for "overall rating of course" question

Instructor

C. Instructors Warranting Further Review

1. Median rating of <3 for "Overall, the instructor was an effective teacher." question

D. Instructors Worthy of Recognition

1. Median rating ≥ 4.5 for "Overall, the instructor was an effective teacher." question

Custom Questions: Custom questions will not be included in OE's review of course evaluation results.

Graduate Program:

- In order for graduate courses/instructors to be identified as "warranting further review" or "worthy of recognition", student response rates on course evaluations must be approximately 80% for courses with 10 or fewer students, and approximately 60% for courses with 11 or more students.

C. Small-Group Facilitator Characteristics for [Name of Facilitator]⁴

	1: Very Ineffective	2: Ineffective	3: Somewhat Effective	4: Effective	5: Very Effective	Not Applicable
The facilitator challenged the team's thinking in helpful, productive ways						
The facilitator helped the team improve our team's creative thinking skills						
The facilitator helped the team improve our team's clinical decision-making process						
The facilitator helped me improve my own clinical decision-making process						
The facilitator helped me become a more effective, efficient self-directed learner						

Open ended: Please provide any feedback about facilitator [Name of Facilitator]²

D. Course-specific custom questions (if applicable)

¹ Instrument updated as needed with input and endorsement of the School's curriculum and assessment committees.

² Diversity and Inclusion questions added beginning Spring 2021.

³ Instructor questions repeat for each individual instructor listed by the course director in the setup survey.

⁴ Student selects their facilitator(s), and facilitator questions repeat for each facilitator selected. Facilitator questions appear only for courses with facilitators. The list of facilitators is provided by the course director in the setup survey.

Spring 2023 Student Evaluation of Course and Instructor Effectiveness Summary Report

PREFACE

The School's [Policy and Procedures on Student Evaluation of Course and Instructor Effectiveness](#) states that the Office of Organizational Effectiveness, Planning, and Assessment (OE), using established criteria, will review all student course evaluation results to determine whether any courses or instructors warrant further review or are worthy of recognition (*Appendix A and B*).

This report presents a summary of the *Spring 2023* student course evaluation results that met the School's established review criteria. The following tables specify the number of courses and instructors evaluated, the number and percentage of courses and instructors *warranting further review*; and the number and percentage of courses and instructors *worthy of recognition*.

It is important to keep in mind that student course evaluations represent *one* component of an overall course and instructor assessment process. The results do not reflect peer evaluation of instructor teaching effectiveness or a comprehensive, systematic review of a course.

Summer 2023 Student Evaluation of Course and Instructor Effectiveness Summary Report

PREFACE

The School's [Policy and Procedures on Student Evaluation of Course and Instructor Effectiveness](#) states that the Office of Organizational Effectiveness, Planning, and Assessment (OE), using established criteria, will review all student course evaluation results to determine whether any courses or instructors warrant further review or are worthy of recognition (*Appendix A*).

This report presents a summary of the *Summer 2023* student course evaluation results that met the School's established review criteria. The following tables specify the number of courses and instructors evaluated, the number and percentage of courses and instructors *warranting further review*; and the number and percentage of courses and instructors *worthy of recognition*.

It is important to keep in mind that student course evaluations represent *one* component of an overall course and instructor assessment process. The results do not reflect peer evaluation of instructor teaching effectiveness or a comprehensive, systematic review of a course.
